

Offer terms and conditions "As many gigs as grains of sand"

Summer 2026 Offer – “As many gigs as grains of sand”

The Summer Offer is available for the subscription of a convergent package (fiber + mobile), under which customers will have the option, selected by default, to subscribe to an Unlimited Mobile line together with any of the available fiber plans at the communicated prices. In addition, customers may add one or more additional Unlimited Mobile lines, subject to the terms and conditions applicable to the additional mobile line offer.

This offer is available for subscriptions made from 12 May 2026 to 31 August 2026. The unlimited data benefit subscribed to by the customer does not have a predefined end date.

Specific eligibility conditions: The promotion is available to:

- New customers subscribing to an Olin fiber and mobile service.
- Existing Olin customers with a mobile-only service who subscribe to fiber and create a convergent package.
- Existing Olin customers with a fiber-only service who subscribe to one or more mobile lines and create a convergent package.

Accordingly, this offer is not available to existing Olin customers who already have both Fiber and Mobile services and subscribe to additional mobile lines or any other service marketed by Olin. The offer is also not available for changes of tariff plan or fiber speed.

For new fiber service installations, a €120 activation fee will apply. This fee will be waived if the customer agrees to a minimum commitment period of 12 months.

Activation of fiber products is subject to network coverage availability in the relevant area and to Olin's General Terms and Conditions.
